Croddy Well Construction to Resume

As part of its Capital Improvement Program, Mesa Water District (Mesa Water®) is constructing a water well and a pipeline in Santa Ana. The well is being built in an industrial/commercial area at 3120 S. Croddy Way.

The drilling and development of the water well have been completed. Work will continue with construction of the buildings that will house the onsite equipment needed to operate the well. Equipment includes an electric motor pump, transformer, emergency backup generator and HVAC unit. Another structure will serve as a chemical storage unit. Construction is expected to be completed by April 2022.

Dates of Construction:

June 2021 – April 2022
Monday – Friday
7:00 a.m. – 3:30 p.m.

Location

3120 S. Croddy Way
Santa Ana, CA 92704

Questions?

Thank you for your patience and understanding during the construction. Should you have any questions or concerns please contact Mesa Water at:

Project Activity During Construction

- Use of heavy equipment
- Excavation and removal of materials including soil
- Deliveries of equipment and materials

Potential Impacts

- Some noise, dust and vibration during drilling activity

Traffic Management & Access

- Through-traffic will be maintained at all times
- Driveway access, trash and delivery services will not be affected

Background

Mesa Water District provides potable (drinking) water for a population of about 110,000 within an 18-square-mile service area that includes Costa Mesa, portions of Newport Beach and portions of unincorporated Orange County. Mesa Water is constructing two new water wells and 4,500 feet of pipeline that will connect into the District's existing distribution system and allow Mesa Water to increase local water production capacity.
