

# Balanced Energy for Everyone

Realizing California's **Energy Future**

Mesa Water District  
November 19, 2020

CA has ambitious clean air goals but to meet them the challenges are big and complex

Governing Law – SB 100

60% renewable energy by 2030

100% carbon-free energy by 2045

CHANGE IS PERSONAL!!!

How do we get there?  
S and REGULATORS  
to have identified  
/:  
ATION

LOOK AT OUR FUTURE

This is not a case of either/or

We need to work together  
and embrace a philosophy of

**BOTH + AND**

3

Here is why:

- Intermittency Issues
- Storage
- Reliability
- Emerging Markets & Technologies
- Affordability

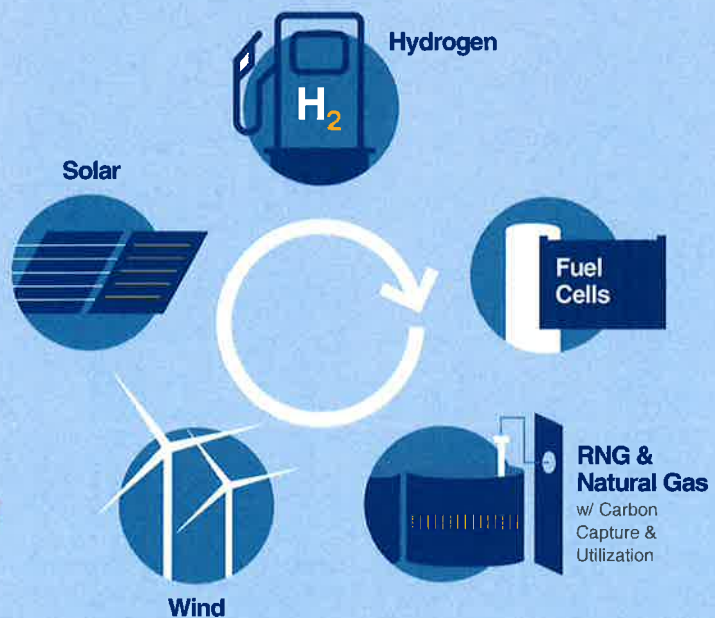

4

# Limit the options, and you limit the future

5

## With an integrated approach

we can achieve our  
goals and preserve  
choice, while  
minimizing disruption  
and cost

6

# Thank You

Happy to take any questions!
