

CONSTRUCTION NOTICE

August 11, 2021

Pipeline Pre-construction to Start Survey and Utility Location Activity

Dates of Activity

August 16 through September
Survey work and potholing
Monday – Friday
7 a.m. – 5 p.m.

Background

Mesa Water District provides potable water for a population of 110,000 within an 18-square-mile service area that includes Costa Mesa, portions of Newport Beach and portions of unincorporated Orange County.

Mesa Water is constructing two new water wells and a 4,500-foot pipeline that will allow the District to increase local water production capacity. The project is expected to be completed by Spring 2022.

Mesa Water's top priority during constructions is safety.

Questions?

Thank you for your patience and understanding. Should you have any questions or concerns, please contact Mesa Water at:

As part of its Capital Improvement Program, Mesa Water District (Mesa Water®) is constructing two water wells and a pipeline within the City of Santa Ana. The project began in August 2020 with construction of the two wells. Pipeline pre-construction is starting with survey work and locating existing underground utilities.

The water well located at 4011 W. Chandler Avenue will be connected to the water well located at 3120 S. Croddy Way, by a 2,200-foot pipeline. An additional 2,300 feet of pipeline will connect the well on Croddy Way to Mesa Water's existing distribution system on Hyland Avenue and MacArthur Boulevard in Costa Mesa.

Pre-construction activities, including surveying and underground utility location, is expected to begin the week of August 16, 2021.

Project Activity During Construction

- Construction signs to notify residents, drivers, pedestrians and cyclists of construction activity and parking restrictions

Potential Impacts

- Temporary parking restrictions and street impacts during pre-construction activities

Traffic Management & Access

- Through-traffic will be accessible at all times
- Driveway access, trash and delivery services will not be affected
- Temporary lane closures in work area

There will be no disruption in water service to customers in the project area during this time.
